Ethernet Gigabit Ports. RJ45 standard with the flip structure design, makes the whole HUB Ultra-slim USB-C Charging port supports PD3.0, supports 100W power in, power out(charging) is limited to 87W for safety.	
How to use		Notes		Troubleshooting	
Plug the USB-C male connector of the Hub into the USB-C port on your USB-C laptop. USB-C Power Delivery: Charge your laptop by plugging the USB-C Charger to the Multiport Hub USB-C Female Power Delivery (PD) port. HDMI Outputs: Connect to your Data Monitor, UHDTV or projector with an HDMI 2.0 cable via the HDMI output port and start working, watch videos from your USB-C laptop on your Monitor, TV or other HDMI-enabled devices.	USB Ports: We recommend you use the 2x USB-A/1x USB-C 10Gbps ports for Web Camera, Hard Drives, data transfer and other speed demanding USB-peripherals. 2 x USB-A 2.0 Ports we recommend you use for keyboard, mouse, headset, wireless USB dongles and other USB 2.0 USB peripherals. RJ45 Ethernet: Connect to your network via RJ45 Ethernet cable.	The up to 100W charging speed can only be achieved when used with a 100W rated USB-C PD cable in combination of 100W type-C PD Power Adapter. For more stable connection when using high-power devices, connect a PD Power Adaptor to the USB-C female PD port. The USB-C female PD port of this product is only for charging USB-C laptops whose USB-C Port supports USB Power Delivery(PD). The PD USB-C female port of this product does not support data transfer.	The USB-C female data port of this product is only for data transfer. The USB-C female data port of this product does not support charging. HDMI 1.4 cables only support 30Hz, HDMI 2.0 cables support 4K up to 60Hz. You can also use HDMI 2.1 cables. 4K 60Hz Compatibility requires a DP 1.4 compatible type-C port on your device. Temperature of USB-C Hub can be high when all ports and charging of laptop is used, this is normal. Temperature will be lower after charging is completed.
